TOLEDO, OH (WTOL) – Governor John Kasich announced on Thursday that the Ohio job market has improved this year through JobsOhio, the state's economic development agency.

Kasich reported that between the months of January and September of this year, nearly 12,000 jobs were created, 25,000 were retained, and there was \$1.6 billion dollars in capital investment.

"I think we're starting to win. I don't like to give anybody false hope. It's been too tough for people to have hopes dashed, but the record's beginning to speak for itself." stated Kasich in the statement.
